DEPARTMENT OF THE INTERIOR

Office of the Assistant Secretary of Water and Science

Central Utah Project Completion Act

Notice of Availability of the Record of Decision on the Provo River Restoration Project Final Environmental Impact Statement documenting the Department of Interior's approval for the Utah Reclamation Mitigation and Conservation Commission to proceed with the construction of the Proposed Action Alternative.

AGENCY: Office of the Assistant Secretary—Water and Science, Department of the Interior.

ACTION: Notice of availability of the Provo River Restoration Project Record of Decision.

SUMMARY: On April 1, 1998, Patricia J. Beneke, Assistant Secretary—Water and Science, Department of the Interior, signed the Record of Decision (ROD) which documents the selection of the Proposed Action Alternative (Riverine Habitat Restoration Alternative) as presented in the Provo River Restoration Project Final Environmental Impact Statement (FEIS), MC FES 97-01, filed December 23, 1997. The ROD approves the Utah Reclamation Mitigation and Conservation Commission (Mitigation Commission) proceeding with construction of the Provo River Restoration Project (PRRP) and authorizes Department of the Interior agencies to assist the Mitigation Commission with this project. The Department of the Interior and the Mitigation Commission served as the Joint Lead Agencies in the preparation of the NEPA compliance documents.

The FEIS for the PRRP considered three action alternatives (including the Proposed Action), as well as the No Action Alternative, for river restoration. The Assistant Secretary determined that the Proposed Action Alternative provides the greatest amount of mitigation and enhancement benefit among all alternatives considered.

Construction of the PRRP will restore a more natural stream channel along about 10 miles of the Provo River between Jordanelle Dam and Deer Creek Reservoir through the Heber Valley in Wasatch County, Utah. The project will fulfill Interior's environmental commitments made in the U.S. Bureau of Reclamation's 1987 Final Supplement to the Final Environmental Impact Statement, Municipal and Industrial System of the Bonneville Unit, Central Utah Project (INT FES 87-8). These commitments are now binding upon the

Mitigation Commission. The selected alternative will fulfill the environmental commitments by: acquiring lands in public ownership along the Provo River thereby increasing public access for angling and other low impact recreation, restoring aquatic habitats to increase game fish populations, eliminating fish migration barriers and aquatic habitat impacts currently associated with operating irrigation diversion facilities, and providing public management of newly acquired lands to maximize public recreation benefits.

During preparation of the FEIS, the Mitigation Commission consulted formally on listed species with the U.S. Fish and Wildlife Service (FWS) under section 7 of the Endangered Species Act (16 U.S.C.A. Sections 1531 to 1544, as amended). In a letter dated December 10, 1997, the FWS indicated that the Proposed Action Alternative selected by this ROD is not likely to adversely affect listed or proposed species or designated or proposed critical habitats. Interior and the Mitigation Commission will continue to consult with FWS prior to and during construction to avoid actions that may affect proposed or listed species, or their proposed or designated critical habitat.
